The University of Texas - Center for Lifelong Engineering Education Announces the Forensics Engineering Conference

Event Features lessons learned from Hurricanes, building envelopes, structural failures, foundation and other case studies.

Austin, Texas -- February 25, 2010 -- The University of Texas today announced the Forensics Engineering Conference, a two day long event focused on forensics engineering. The conference will be held on February 25, at the West Pickle Research Building. Featuring many distinguished speakers from both academia and the private sector, this event is open to anyone interested in forensics case studies and best practices.

"We are proud to host the Forensics Engineering Conference" said Cath Polito, Executive Director of the Cockrell School of Engineering's Center for Lifelong Engineering Education at The University of Texas at Austin. "We believe both participants and attendees will gain a firm grasp of the issues that will impact them in 2011."

Speakers include:

David Fowler, Professor, University of Texas
Steve Nichols, Professor, University of Texas
Darrel Holmquist, D.V. Holmquist, Professional Engineer
Narendra K. Gosain, Walter P. Moore and Associates, Inc.
Jim Wiethorn, Haag Engineering
Randy Howry , HowryBreen, LLP
Erik Nelson, Nelson Architectural Engineers

Registration:

To register for the symposium, visit <http://lifelong.engr.utexas.edu/forensics/2010/about.cfm>.

About the Center for Lifelong Engineering Education

The University of Texas at Austin's Cockrell School of Engineering is one of the Top 10 distinguished engineering schools in the country. Our professional development department, the Center for Lifelong Engineering Education, provides busy engineers with immediately applicable, real-world knowledge through individual courses, master's degrees and on-site custom courses.

What Starts Here Changes The World.
